JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Mr. Stowell finds that "when a State exacts redress for the injury to its prestige or interests, it protects society by making it certain to all who harbor evil designs that the transgressor will be brought to book." Inasmuch as such exaction of redress never takes place except the attacking nation be stronger than the supposed offending nation, Mr. Stowell's statement can only be true when the offender is the weaker. He leaves, therefore, the nation superior in power with full liberty to harbor evil designs without fear of being brought to book. But, after all, who is to determine that the weaker nation has wrongfully affected the "prestige or interests" of the stronger? So long as the stronger nation alone settles this matter, there can be neither law nor justice controlling the situation. The whole statement, therefore, amounts simply to an assertion that if the weaker nation does something that the stronger nation conceives prejudicial to it, the stronger nation can attack and inflict its own punishment. This may be true as a statement of fact, the fact being that the stronger nation is a law unto itself; but it is not a statement of anything that may be regarded as fundamental international law.

Again illustrating his idea, Mr. Stowell states that "in view of the many instances in which bombardment and drastic measures have been employed, it is hard to deny that there is a presumption of legality in their favor." In other words, it would seem from Mr. Stowell's declaration that the more often, under circumstances of brutality, stronger nations have taken vengeance into their own hands, the more convincing the proof of their right to be judges in their own cause and to inflict death upon innocent people in nowise connected with the offense. It would seem that the multiplication of ciphers somehow creates a positive quantity. True international law cannot be so written.

All we have said is not a discussion as to whether war is or is not proper or justifiable. It is simply to point out that law is one thing, and that the organized chaos (paradoxically speaking) called war is another and entirely different thing. Confusion upon this point on the part of international law writers has made their teachings a mockery to the laymen, who will not regard international law seriously till a bill of divorcement has been signed between it and war in all its phases. The two do not belong in the same bed.

In the present state of barbarism in international law, or pseudo-international law, the usefulness of Mr. Stowell's book and the occasion for its writing may not be denied.

BOOK REVIEWS

DIE WELTBÜHNE, a weekly publication of Charlottenburg (Berlin), numbers for July 20, August 31, September 28, October 12, and November 16, 1922.

These numbers contain a controversy between Heinrich Kanner, of Vienna, some of whose writings have appeared in *ADVOCATE OF PEACE*, and General Count Montgelas, formerly of the German General Staff.

The controversy grew out of an article by Dr. Kanner in the number for July 20, entitled "*Das Urbild des Weltkriegs*" ("The Original Plan of the World War").

In the first two volumes of the memoirs of Field Marshal Franz Conrad von Hoetzendorf, formerly chief of the Austrian General Staff, Dr. Kanner found six official and two private letters exchanged by Hoetzendorf with the head of the German General Staff, von Moltke. It appears that in 1909, at the time of the European crisis, due to Austria's annexation of Bosnia and Herzegovina, Austria and Germany realized that a world war might thus be engendered, and the chiefs of their general staffs were instructed by their respective emperors and prime ministers to prepare a plan of campaign. This plan of campaign was agreed upon in 1909 and maintained and developed in subsequent years. In 1914 it was this very plan that Germany and Austria pursued. These facts are indubitable. The issue between Dr. Kanner and General Montgelas turns on their significance. The former contends that the will to war on the part of the emperors, their prime ministers, and the chiefs of their general staffs is evidenced by the formulation of

an offensive military plan of campaign, particularly in view of the fact that Bismarck always refused to allow the military chiefs of Germany and Austria to agree upon such a plan. General Montgelas endeavors to show that the making of such a plan was merely a routine duty of the two chiefs of staff. He disputes that it was binding; in fact that it was a formal agreement. Thus the historians dig up and bury their dead over and over, not always recognizing the corpse as together they look sadly on, arguing heatedly the while.

THE LITTLE CORNER NEVER CONQUERED: THE STORY OF THE RED CROSS WORK FOR BELGIUM. By *John van Schaick*. The Macmillan Co., New York. Pp. 1-248; appendices and index, pp. 249-282. \$2.00.

Dr. Van Schaick has here written a faithful account of what followed when the American Red Cross forces entered Belgium. It is not a brilliant book. It is another of the fairly numerous—and they should be wholly welcome—stories written about one phase or another of American activity in the war by men who participated in the activity, and who set about leaving an account of it with much the same thoroughness and devotion that they displayed during the war. The time will come when all of these efforts will be parts of a total of knowledge that will be of very large importance.

In this volume the beginning is made very simply with the statement that the War Council of the Red Cross, the government approving, sent a commission to Europe in 1917. Dr. Van Schaick explains that the head of the commission was Grayson M. P. Murphy, a successful New York banker and West Point graduate, who had a way of getting things done. He continues in a careful, exact sort of fashion to tell what happened in the first days after the commission reached Europe, and then he gets into its larger work.

With his heart evidently filled with admiration for the part Belgium played in the war—an admiration that has not dulled in the passing of time—the author tells what Belgium's daring and suffering had been, and so he finds his way into descriptions that touch by their simplicity and sincerity, even as they did in the days between 1914 and 1918. Stories of refugees, stories of children, stories of parted families—too often parted forever—and, happily, stories of generous American effort to do whatsoever money and willing hearts could do to bring relief. Dr. Van Schaick has done a useful, patient work.

The little corner never conquered refers to that tiny portion of Flanders behind Ypres and the Yser which was held by the Belgian army for four years of the war. Small as the area was, it called for as much intensive relief work as any district affected by the war, and Dr. Van Schaick has written a faithful and interesting account of the activities of the American Red Cross in that section.

The problems to be handled were many and various. Every sort of assistance, military and civil, was needed urgently by the Belgian army and the remnant of unconquered country, but undoubtedly the most difficult problem was afforded by the thousands upon thousands of refugees who fled before the German occupation. Of these, almost four million eventually reached England, many by way of Holland, where they were not wanted and could not be cared for; thousands more went into France, where they eventually gathered into groups and were greatly assisted by the A. R. C.

It was, perhaps, especially fortunate for these that the American Red Cross was in a position to help them, for most of the refugees, being Flemish and of the lower classes, had alien and difficult temperaments and eventually became very unpopular, both in England and France. The work done in this regard is ably, and at times entertainingly, described by the writer.

Nothing, however, could give a better impression of war conditions than the chapter devoted to children's stories, some of them related by the children themselves and others evidently recorded by A. R. C. workers. Children's colonies were organized and assisted by the American Red Cross, in which as much as possible of this tragic flotsam and jetsam of war was gathered and cared for, but the inevitable misery

and demoralization of numbers of these youngsters remains one of the saddest incidents of the war.

MODERN ITALY. By *Tommaso Tittoni*. The Macmillan Company, New York. Pp. 236. \$2.00.

This picture of the intellectual, cultural, and economic aspects of Italy today is the series of lectures, delivered last year, at the Williamstown Institute of Politics, by the President of the Italian Senate. Signor Tittoni sketches in the book the salient features of Italy's contribution to literature, art, science, international law, economics—in short, to the sum total of modern civilization. Interesting as is his exposition generally, it has a special value in furnishing for its American reader the cultural background of the large and oftentimes important Italian immigrant population in the United States. These millions of Italians had come to our shores with the centuries of Italy's culture behind them. The author calls attention to this, particularly in the last chapter of the book, in which he discusses the question of the Italian immigration to the United States and touches upon the immigrants' contribution to American life.

RUSSIA TODAY AND TOMORROW. By *Paul N. Miliukov*. The Macmillan Company, New York. Pp. 392. \$2.25.

None of the Russian political leaders and writers is so well known or appreciated in the United States as Professor Miliukov; none has had so much personal contact with American readers and audiences. In 1903-5 he came to America and lectured here, in Chicago, Boston, and New York, and his lectures were brought out later as a book, under the title of "Russia and Its Crisis." Last fall, during the Washington Conference, he came to the United States again, and again lectured to large and sympathetic American audiences in a number of large cities. "Russia Today and Tomorrow" is the result of these lectures.

The thesis of the book is that the year 1921 marked a definite turning point of the Russian Revolution. Two phenomena marked what the author calls the completion of the cycle of revolutionary events in Russia, one of them representing a crisis in the "White" movement and the other in the "Red." As the author puts it, "the former ran its course with the loss of the last patch of anti-Bolshevist territory in the Crimea, the latter with the Great Russia famine; General Wrangel's defeat manifested the degeneration of the 'White' movement, the famine of 1921 demonstrated Russia's exhaustion under the Bolshevik rule."

That is Russia today. What of Russia tomorrow? Professor Miliukov's answer to this question is summed up in the following words: "There will be neither anarchy nor monarchy in Russia of tomorrow. There will be democracy. It will be a peasant democracy." Based on the principle of universal suffrage, the author believes, this Russian democracy will effect a regeneration of the economic and political life of the country and will work out forms of federative union under which practically all of the numerous nationalities that had been incorporated in the vast Russian Empire will come to live in peace and prosperity.

THE MAKING OF MODERN JAPAN. By *J. H. Gubbins*. Seely, Service.

Here is a book on Japan by a man who has made that country a subject of lifelong study. The *London Times*, in commenting on the book, says of the author and his work:

"As was to be expected from one who has written a dictionary of the Japanese language, not to mention learned treatises on the Civil Code and the family system, Mr. Gubbins approaches the muse of Dai Nippon's history in a spirit of high seriousness, alleviated by the courtesy of diplomatic usage. He tells the story of the progress of

Japan 'from pre-feudal days to constitutional government and the position of a Great Power' without fear, favor, or affection—indeed, with very little indication of his personal sympathies and opinions. He records the failures and successes of Japanese statesmanship with methodical, dispassionate, and almost mathematical precision; he is obviously more concerned to tabulate results than to analyze causes, and remains curiously indifferent, as a rule, to the human side of statecraft—to the qualities and defects of individual statesmen. Therefore his exposition of the evolution of modern Japan is likely to appeal rather to the earnest student in search of accurate knowledge than to the casual reader, who generally likes his history tempered with the humanities, and even with the pomps and vanities.

"Concerning the causes of friction which since the Russo-Japanese War have gradually impaired the previously existing cordiality between Japan and the United States, Mr. Gubbins writes with intimate knowledge and strict impartiality; his observations on the effects of the Great War on the general situation in the Far East are also worthy of close attention. Students of Far Eastern affairs may regret that his instructive survey of that situation should have been carried no further than the Treaty of Versailles, and that his work contains no reference to the inner significance and probable results of the Washington Conference. Particular interest and value would undoubtedly have attached to his explanation of the policy pursued by Japan's representatives on that momentous occasion, and to a critical comparison of their attitude with the prudent policy of watchful waiting prescribed by the elder statesmen, in somewhat similar circumstances, when Russia, France, and Germany united to deprive her of the Liaotung Peninsula and other fruits of victory in 1895. Mr. Gubbins gives a particularly lucid exposition of the influence wielded in public affairs by the Genro since the restoration, and of the several parts played by them in the making of modern Japan."

BOOKS RECEIVED

THE SUPREME COURT IN UNITED STATES HISTORY. By *Charles Warren*. Three volumes; 1569 p.; appendix, bibliographies and index. Little, Brown & Co., Boston. \$18.00 net.

CARNEGIE ENDOWMENT FOR INTERNATIONAL PEACE. Year Book, 1922; p. i-xvii, 1-239; index. Published by the Endowment, Washington, D. C.
